

DEFINING BLOCKCHAIN

**In Metrics, Collateral, and Correlating Sciences
that legacy Investors and Regulators Consider Valid**

*[1st in a series of 5 analysis posts that
replaces hype with knowledge from one
of the few world Blockchain "Thought Leaders"]*

THREE "GENIUS" PARAPHRASES TO BEGIN CAPTURING THE FULL POTENTIAL OF BLOCKCHAIN

Elon Musk: To determine the "First Principles" of anything start with its Physics

Alex Mashinsky: We've only solved "our" problems – to Scale with impact we must solve "their" problem

Jeff Bezos: A newcomer must see every threat and step in its future, then sprint before we see the race started

Blockchain's Edge Tech Intersections will uplift humanity in ways you can't yet imagine. My goal starts with giving you the "plasticity of the mind" so you *can* imagine it – then wisely invest toward it. I teach you "how" to think instead of "what" to think in investing, regulations, cultural impact, and virtues. Satisfying the above quotes required over 2,200 pages of unique analysis, coordinating global regulations, five sciences, dissecting crypto news, and then merging Eastern and Western Philosophy to respect national cultures and protect citizens, creators, and currencies. One Silicon Valley famous expert declared, "You've written the Bible for Blockchain" ... proprietary "gold" in Consulting.

First, we must truly define this Edge Tech/FinTech arena, because currently, all crypto is based on hype, and success is just on timing. It's backed by no proven collateral and built on sand- but doesn't need to stay that way. Instead of it based on "nothing" it can be based on 'everything' ... everything that gives us meaning and obeys the Laws of Nature as well as legacy investment rules. Defining Coins and Tokens is the last thing crypto news want. They're so deeply invested in crypto exploding in value that they are compromised.

So, I must present my breakthroughs via legacy, proven financial news for traditional investment funds like Financial Times.

They need hype, fantasy, nihilism, FOMO. They demanded liquidity. Now crypto includes synthetics, futures, SPAC's, obscene leverage.

The two top NFT platforms drive 90% of bidding and can manipulate up the value from junk to tens of millions. Why? Undefined! Finally, Blockchain simply cannot do all that's claimed, but they juice up ICO's by claiming they solve Climate Change, inclusivity, or gender rights.

Crypto news site "experts" are like scientists before microscopes and astronomers before telescopes.

Review a year of predictions on the top crypto news sites: 80% or more were wrong. Review my books, almost 100% proved correct.

If you can't define it, you can't measure it.

If you can't measure it, you can't exploit its Physics energy.

Without energy, you cannot Scale or solve "their" problem.

Biology correlations? Nature is the Coin's traits: ignore Nurture and you face extinction.

DESIGN TO SPECIFICS

DESIGN TO ACCELERATE

DESIGN TO PIVOT

DESIGN TO SURPRISE

WIN THROUGH YIN

EARN THROUGH ZHI

DESERVE THROUGH TELOS

To survive, use moral legacy financial metrics and obey the five sciences.

My unique, tailored "Sustained Global Disruption Advantage" (S.G.D.A.) fulfills all the above.

With every force trying to make us less human, your Brand becomes known as one of the few forces whose Telos was to protect what keeps us human. Can't beat that for Brand identification. Plasticity of the mind allows you to build upon the bedrock of virtue, then engages you with the first "Accelerating Philosophy" to recognize the greatest investment in technology.

To fathom and then own optimum breakthroughs that will truly blow your mind and ROI, engage me via S.G.D.A. Consulting.

DYNAMICS, NOT SYSTEMS

Correlate Systems, Control the Dynamic

[2nd in a series of 5 analysis posts that replace hype with knowledge from one of the world's few Blockchain "Thought Leaders"]

Blockchain Intersections will create the first "Organism-Environment" - being aware in crossing this threshold morality must be designed into the Dynamic's Genesis!

Almost all Blockchain attention is on the monetizing of it and the financial system. Lesser attention to the regulatory, political, and security system, and even less to the culture and humanity systems. A "Dynamic" forms that determines our fate, yet not a single leading Exchange, Platform, Cryptocurrency, DLT, or ICO considers all the Systems to complete the Dynamic yet. The first to do so, or be a leading player in it, must understand that all those examples are just Organisms, and we're simultaneously creating the Environment that determines if these Organisms are safe or poisonous. Nature reflects great truths: ergo, the ocean is the best example of an Organism-Environment that is healthy, dominates the world in harmony with people, as their Systems obey the Laws of Nature. Left out by Crypto Whales, Bitcoin, and news are the scientific proofs, and the mitigating of human nature essential for a Dynamic that preserves nations and the Systems we rely upon – all the way down to the system of measuring Time itself.

The optimum Dynamic will accelerate hardware innovation for Metaverses while leading-by-example for wise, lasting regulations.

Examples of threatening Organisms: hackers, rug-pullers, shadow banking, money laundering, and even "The Whales That Cry Wolf" shouting Bitcoin will hit \$200,000 and is a store of value.

Examples of threatening "Environments"

"The Nine Nazguls of Blockchain"

I.R.S, DOJ, SEC, NSA, FinCEN, CFTC, OFAC, Derivatives, and the Big Tech Oligarchies

Macro-Environments in action:

**The Fed's power to demand global corporate tax rates,
The Treasury's upcoming tax ambush,
and U.S.A. Inflationary Money Printing.**

**HOW TO BE PART OF AN ETHICAL ORGANISM-ENVIRONMENT
WHILE ENJOYING HIGH ROI AND EXCELLENT BRAND RECOGNITION**

Act within a Vertical Business Model

Realize MAS/FINMA are our allies, not foes

Correlate all Systems to orchestrate the Dominant Dynamic

Invest in the seeds from which all financial fruit grows

To fathom and then own optimum breakthroughs that will truly blow your mind and ROI, engage me via S.G.D.A. Consulting.

BLOCKCHAIN: WHAT IS MAN'S PURPOSE?

Maxwell's Demon, Qualia, Derrida, and Theseus Paradox

[3rd in a series of 5 analysis posts that replace hype with knowledge from one of the world's few Blockchain "Thought Leaders"]

Ray Kurzweil: If we combine strong AI ... and other exponential trends, technology will appear to tear a hole in the fabric of human understanding ... our event horizon ...

The two Physics books that revealed the potential of Blockchain when all sciences are correlated are "The Three Body Problem" by Liu Cixin, and "The Janus Point" by Julian Barbour. Both integrated the three-body problem in completely different ways: the first book by illustrating the value of an accelerating knowledge. The second by explaining how "complexity of dynamics" counterbalances entropy, ultimately altering our concept of Time itself. Why my Will was drawn to read both books is a mystery of creation, yet on page 383 Barbour finally revealed why to me: the essential force to join systems of higher complexity is "art." In my case, filmmaking. If you can stretch your mind to recognize that the two greatest systems of complexity are filmmaking and Blockchain Edge Tech (Metaverse with A.R.) then you build toward this Singularity, accelerating humanity toward uplifting innovation and the profits from it. Only C.I.T. took four years to correlate it all.

"Maxwell's Demon" proven since 1867 reflects the power that Metaverses will have on the human mind and our lives. Build the bridges to this ultimate event, and you call the shots.

I've written hundreds of pages proving better innovations and unseen problems like "Dark Clouds", but to spare you the long reading time, the ultimate Metaverses will not just answer the great questions of humanity, you will *experience* the answer.

THE THESEUS PARADOX

QUALIA

THE MOLYNEUX PROBLEM

Testing you is Nikola Tesla: A man's reach exceeds his grasp, a man's grasp exceeds his nerve. Can you hold the reins of Plato's Thumos chariot?

Do you need to know the "Reciprocal Lattice + Fourier Series Quantities over Brillouin Zone Formula" to engineer Cloud for this? Or $k=k_x, k_y, k_z$? Or that Dumb Matter will mimic Smart Matter and self-organize into a lattice that has as its Will the desire to move toward greater elegance? Or that Events Have Walls? No - but I do. "The Centralized "Decentralized" Information within Blockchain will be The Hammer of Thor!" Will the hand wielding it be virtuous? What you want to know are the characteristics of durable crypto.

The Primary Factors Determining a Dominating, Durable, and Noble Digital Currency:

**RARITY COMPLEXITY FLOAT SCALE SPEED VAULT REWARD POLITICS COLLATERAL
SECURITY PROMISE LEVERAGE PIVOT BURN BALANCE CULTURE NETWORK
MERGING QUOTIENT?**

IS IT FIRST IN ITS SPECIALTY?

DOES IT SOLVE "THEIR" PROBLEM?

WHAT WILL MAXWELL'S DEMON DO WITH ALL THAT ENERGY?

"I am the horse player that became the racetrack." Bukowski ----- Don't be Bukowski

To fathom and then own optimum breakthroughs that will truly blow your mind and ROI, engage me via S.G.D.A. Consulting.

"THE UBER-IZING OF HOLLYWOOD"

[4th in a series of 5 analysis posts that replace hype with knowledge from one of the world's few Blockchain "Thought Leaders"]

Filmmaking is now a technology investment ... or more accurately, the greatest technology Investment will rely on owning the Original Content/I.P. that delivers the films' usual ROI in Box Office, Merchandise, Music, and Streaming. Production will be modified to then command The far greater revenue streams: Games, Super Apps, A.R., X.R., and Metaverse.

The top investment classes for 2019 and 2020 were Games, Edge Technology, and Blockchain. Yet, sources must find partners outside their system, making for a weaker Dynamic.

The first "Vertical Business Model" that has the Original Content, Technology knowledge, ability to Produce films, Patents in Edge Tech, and is located in the best nation generates ROI shared with less players, lower taxes, and transparent accounting under one umbrella. This will "change everything" and be the only way to create Metaverses without future legal issues.

THE ONLY COLLATERAL THAT CAN INCREASE IN VALUE ON PROVEN REVENUE STREAMS AS FAST AS A COIN OR TOKEN SKYROCKETS IS GAMES, ROYALTIES, AND EDGE TECH BUILT OFF THE I.P. OF FILMS. THE GIFT THAT KEEPS ON GIVING.

When just two games or game makers announce they'll release an interoperable token that is redeemable, it's huge news.

Creativity First Films Studio using Crypto-Integrity-Tao proprietary breakthroughs and Patents off the films and Streaming will create over 30 MMORPG, 15 Mobile Games, and 23 Apps – ALL using one interoperable token, solving Gamer problems like cheats and stuck money by using DLT Services.

**ONLY A VERTICAL BUSINESS MODEL CAN DELIVER THIS!
Hollywood would never offer this – so we "Uber-ize" Hollywood!**

To fathom and then own optimum breakthroughs that will truly blow your mind and ROI, engage me via S.G.D.A. Consulting.

iMAGINING THE ULTIMATE METAVERSE

Hint: How did Google become Google?

[5th in a series of 5 analysis posts that replace hype with knowledge from one of the world's few Blockchain "Thought Leaders"]

Technology, hardware, and experience arenas will evolve quickly to deliver a Metaverse experience close to a video game or --- imagine jumping onto the planet in "Avatar."

Proprietary I.P. of Crypto-Integrity-Tao will accelerate all these innovations, and it isn't a Blockchain-based tool, this I.P. is a proven revenue stream. Knowing that Metaverse will accelerate creatively, how do we ensure it holds lasting value?

- **DON'T JUST BASE IT ON PROFIT, BASE IT ON WHAT GIVES LIFE MEANING: FAMILY, CULTURE, SECURITY, UNITY, INTEGRITY, PERSONAL HEROISM**
- **ASSUME AGENCY: EVERYTHING UNTRUE MUST DIE, YOU CANNOT BE KNOWLEDGE THROUGH OTHERS, SUBLIME VISION RESULTS IN SUBLIME REALITY**
- **BUILD IT WITH THE POWER OF STORY: THE INDIVIDUAL AS A HERO, AND ALL THE GAMES, APPS, AND EDGE TECH THAT ENGAGES USERS IN THAT POWER**
- **ALL NFT'S/PROPERTY MUST HAVE PROVEN UNLYING COLLATERAL, LONG TERM... AND MUST BE IN A VERTICAL BUSINESS MODEL – THE SOURCES OF ART**

Now we get to the riddle "How did Google become Google?" The founders figured out how to make a billion users do the heavy lifting to discover the ultimate search engine. The company reversed the flow and made the individual a greater algorithm.

Crypto-Integrity-Tao is the only Blockchain Thought Leader that realized the ultimate Google way to do this, not just for its own Metaverses but for any Metaverse. The achievement and acceleration are mind-boggling. Secret ingredients, maximized by Singapore's superior MAS regulations, DBS Bank's Coin, and its sage investment funds and neutral politics. Even the best supporting Networks, tech, and Telecoms for this are in Singapore. "A Google based in Singapore" – Outstanding!

**Crypto-Integrity-Tao will open a Sandbox for specific companies already chosen, consulting clients, and agencies there and a tandem Sandbox in Switzerland to keep acceleration in balance.
My I.P., vision, and prerequisites will lead clients to their own patents.**

To fathom and then own optimum breakthroughs that will truly blow your mind and ROI, engage me via S.G.D.A. Consulting.
